PROFILE

Computer Science Engineering student and Full Stack Developer with hands-on experience in developing scalable web applications using MERN. Strong foundation in Data Structures and Algorithms with good problem-solving skills and competitive programming experience. Passionate about writing clean, efficient, and maintainable code while building user-centric applications with real-world impact.

PROJECTS

Expense Tracker – Full Stack Finance Management Application

- Developed a full-stack expense tracking application to manage daily income and expenses with interactive dashboards and real-time insights.
- Built the frontend using React.js and the backend using Node.js and MongoDB for efficient data management.
- Implemented secure RESTful APIs and CRUD operations for seamless transaction handling and categorization.
- Integrated Redis caching to optimize API response time and improve overall application performance.
- Designed responsive and user-friendly UI components to ensure a smooth experience across devices.
- Utilized Git and GitHub for version control and collaborative development workflow.
